## About Me

Product-driven Software Engineer with 7+ years of experience building and shipping production-grade software, from enterprise platforms used by thousands to independent products launched from scratch. Delivered solutions for major organizations including BRI, Pertamina, Alfamart, and Bank Muamalat, while independently architecting and launching full-stack products with real-world users.

Strong across frontend engineering, full-stack development, and mobile applications, with expertise in React, Next.js, TypeScript, React Native, Node.js, and modern cloud infrastructure. Combines strong engineering fundamentals with end-to-end product ownership, performance optimization, and the ability to turn complex requirements into reliable, production-ready solutions.

## Technical Skills

- **Frontend:** React.js, Next.js, Vue.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Zustand, TanStack Query
- **Mobile:** React Native, Expo, Offline-First Applications
- **Backend:** Node.js, Bun, Hono, Python, Django, REST API
- **Database:** PostgreSQL, Drizzle ORM, Redis, SQL
- **Real-Time & Media:** WebSocket, Canvas API, WebCodecs, MediaBunny, H.264, Audio/Video Processing
- **AI & Automation:** LLM Integration, DeepSeek, Mistral AI, OCR, Voice-to-Text
- **DevOps & Infrastructure:** Docker, Coolify, NGINX, Cloudflare, GitHub Actions, Linux, S3 Storage
- **Engineering:** API Integration, System Architecture, Performance Optimization, Production Deployment, Troubleshooting, CI/CD, Git

## Selected Achievements

- Delivered enterprise software for BRI, Pertamina, Alfamart, Bank Mandiri, and Bank Muamalat.
- Improved frontend performance by approximately 30% through architecture modernization.
- Built and launched multiple independent software products from concept to production.
- Developed offline-first mobile applications and real-time web systems.
- Implemented AI-powered automation for financial data processing.

## Professional Experiences

**Frontend & Mobile Engineer | Balesin.id** February 2022 – Present
- Led migration to Next.js, improving Core Web Vitals and reducing load times by approximately 30%.
- Built an offline-first POS application with React Native (Expo) supporting uninterrupted retail operations.
- Developed internal CMS tools that reduced content publishing cycles from days to hours.

**Founder & Solo Engineer |** Riungin.id **| Side Project** 2026 – Present
- Architected and launched an end-to-end event platform integrating digital invitations, RSVP, QR check-in, guest management, virtual photobooth, and real-time slideshow.
- Engineered client-side audio/video processing with MediaBunny and WebCodecs, including H.264 encoding and voice message processing with under 150ms on-device latency.
- Built dynamic 2D Canvas photo compositing and real-time event synchronization for interactive guest experiences.
- Developed full-stack infrastructure using Bun, Hono, PostgreSQL, Drizzle ORM, and S3, owning architecture, development, deployment, and production maintenance.

**Founder & Solo Engineer | sesaKu | Side Project** January 2026 – Present
- Built and launched an AI-powered personal finance platform as a solo engineer.
- Automated ~90% of expense tracking through OCR and voice-to-transaction AI workflows.
- Designed and maintained self-hosted production infrastructure using Docker and Coolify.

**Freelance Frontend Engineer | Arnatech** January, 2021 - December, 2025
- Delivered enterprise solutions for BRI and Pertamina serving thousands of users.
- Built real-time monitoring dashboards powered by WebSocket data streams and AI analytics.
- Led frontend development for enterprise knowledge management and operational reporting systems.

**Senior Frontend Developer | Wir Group** April, 2020 - February, 2021
- Developed production web applications for Bank Mandiri, Bank Muamalat, and Alfamart.
- Contributed to frontend architecture and a B2B ordering module integrated into mobile banking.

**Junior Fullstack Developer | Yuna & Co** February, 2018 - April, 2019
- Developed backend APIs using Node.js and Django.
- Improved product data quality and frontend performance across e-commerce systems.

## Education

**Makers Institute** 2017 - 2018
Full Stack Development Bootcamp
**UIN Sunan Gunung Djati Bandung** 2011 – 2016
Bachelor of Engineering (B.Eng.) in Electrical Engineering
